Our Partners

The Emergency Reporting Platform continues to add value as the most trusted Fire and EMS Records management solution. Our system integrates with some of the top names in the industry to deliver a seamless solution for your agency. Some of our featured partners include:

CREWSENSE

As a leading scheduling platform and automated scheduling platform for Fire/Rescue agencies, the Crewsense product line handles department scheduling needs whether you are a volunteer, combination or a career department. This affordable solution includes CrewScheduling, a mobile app, payroll exports, time of request routing, employee availability and more. Cost starts at just one dollar per user, per month.

Rhodium Incident Management
Powered by IRT

Our partnership with Rhodium helps you bridge the gap between your CAD system and your ER records management system with a digital command board that provides electronic accountability, pre-plan access, checklists and more. The Rhodium™ Incident Management Suite provides a complete command and control solution allowing you to quickly consolidate information, coordinate assets and act.

streetwise® CADlink

StreetWise CADlink® response software for your Android, iPAD or Pierce® Command Zone™ device provides MDT-style features for use in responding apparatus. The integration with Emergency Reporting allows StreetWise to automatically create a new incident report in your records management system before your crews have even returned to the station. Incident location, nature, date and dispatch time will all auto populate in your NFIRS report, saving your crew time and dramatically improving the accuracy of your response time analysis.

Spotted Dog TECHNOLOGIES

Spotted Dog Technologies' real-time volunteer emergency response (ROVER) system is a comprehensive solution that provides all the tools you need to effectively manage first responder resources. ROVER closes the communication loop on traditional call-out systems by providing critical insight into the availability and location of first responders.

HALLIGAN

Halligan is a mobile truck check and work order solution that allows you to perform apparatus checks quickly and easily from your tablet or phone. With our integration, you can leverage Halligan's powerful, innovative tools while still having all of your data live in ER. Halligan solves the entire workflow from identifying problems to issue resolution. Save time and money for every piece of equipment in your fleet with apparatus checks, real-time notifications, budget-balancing analytics, configurable checklists and secure check history.

MOBILEeyes™
ENABLING A SAFER WORLD

Easily review inspection history, update pre-plan information, perform inspections and create a professional report in the field with MobileEyes pre-fire plan and inspection software from TradeMaster Inc. With your pre-fire plan data integrated into ER, your frontline staff has full access to occupancy data in the field, as well as to the full ER reporting and records management system. Eliminate redundant data entry with effortless data syncing, and create and deliver invoicing in the field.
